

How to create mySQL datasource in Eclipse IDE:

Follow the given below steps if your mysql temporary password or expired password is not working.

Stop the mysql server from system preferences.

Go to mac terminal:

- `mysqld_safe --skip-grant-tables &`

Open a new terminal:

- `mysql -u root`

- `use mysql`

- `SET PASSWORD FOR 'root'@'localhost' = PASSWORD('MyNewPass');`

- `quit`
